Lot Numbers:
The animals are tagged with their catalog lot numbers.

Health:
All cattle sell with health certificates, ready for immediate shipping. Bulls have been vaccinated and PI tested, and have passed a breeding-soundness evaluation.

Delivery:
Free in-state delivery of bulls, or we will give a \$50 per lot refund on bulls picked up sale day.

Guarantee:
All bulls selling for \$2,500 and above are guaranteed against breeding injury for the first breeding season, defined as the 90 day period following the first turnout of the bull. An injured bull will be replaced by its breeder with another bull, if available or a credit in the amount paid, less salvage value of the of the injured bull, will be given toward another of the breeders' bulls in next year's sale. This breeding guarantee does not cover the death of a bull.

Food:
A complimentary lunch will be served.

LiveAuctions.TV

ON-LINE BIDDING INSTRUCTIONS:

Go to www.LiveAuctions.tv. Please note that you do NOT need an account to watch the auction, but you do need to register an account and request a buyer number if you wish to bid. You only have to register once. Click "Register" in the top right corner of the homepage and create a new account. Once you have completed the form on this registration page and hit the "Register" button you will receive an email with A place to click on to verify you have entered a valid email address. Once you have completed this registration process, find the auction you are interested in on the home-Page or "All Auction" webpage and click on it (auctions are listed in chronological order). You should then see a box that says Login. Now that you have an account with LiveAuctions just type in your email address and password. You will now see a hyperlink at the top

that says "Request a Buyers Number". The first time you request your first buyer number on LiveAuction.tv it will send you a text message with a verification code in it. Type the code from the text message into the area requiring it and you will then see your name along with a buyer number listed at the top of the webpage where the live video is and you will be able to bid. You will only have to complete this two-step verification process one time. After that you will be able to immediately request a buyer number on any auction without verification through an email or text message again. Bidders who are successful in making purchases will be contacted by the ranch after the auction to settle payment and discover your shipping plans. If you need help registering to bid or to view the auction please call Technical Support at (682) 816-4900 or email Tech-Support@LiveAuctions.tv.

FICKEN ANGUS FARMS

John & Deanne Ficken;
Lance & Tammy Ficken
Bison, KS
785-356-2425

Ficken Angus Farms was started in 1940 by my parents. That herd was dispersed in 1968 due to drought. My wife and I started a new herd in 1972 with three cows from the Green Garden herd at Ellsworth, Ks. Two more cows were added the next year from Willard Ericson at Marquette, Kansas. From that meager start, we applied our philosophy to breeding Angus cattle.

Our three children showed cattle and were involved with the operation until they were out of high school, except our youngest son, Lance, who maintained a small group of cows. He and his wife are partners in the operation. Our ideas of how

cattle should perform have not changed from the beginning.

Cattle exist to produce meat; that is the goal. We expect our cattle to be better than average in the major EPDs and dollar traits. We have never bred for extremes in any one trait, and our herd has always been selected for calving ease, structural soundness, good udders, and carcass quality. Our mission to produce cattle that the commercial cattleman can make a profit at any level they choose to sell, and the buyer will want those cattle again. "That goal is an ever-moving target; we are getting closer to the bullseye every calf crop."

Heifer Bull. Solid march bull who has done well, with a solid set of EPD's.

RAFTER W CATTLE COMPANY

Travis Williams
Paola, KS | 816-820-6721

Rafter W Cattle Company began in 2006 while running cattle with my father Roy Williams. My twin brother and I showed cattle when we were younger, and once my daughters were in 4-H they started showing registered Angus and Simmental cattle.

In 2018 Rafter W made the transition to exclusively a registered Simmental/ SimAngus, herd when the operation moved to La Crosse, KS to be co-managed by my cousin Lance Ficken at Ficken Angus Farms. The foundation of our Simmental program began with genetics from, Ruby Cattle Company, Cow Camp Ranch, Schooley Cattle Co, Shoal Creek Land and Cattle, Sunflower Genetics, Schick Cattle Co and Triangle J Ranch.

I believe utilizing the Simmental/SimAngus breed, creates

an eye-appealing marketable animal that possesses highly desirable maternal and carcass traits that make them extremely valuable in every segment of the beef industry. My breeding objective is to select AI sires that possess structural soundness, excellent phenotype and are in the top 1/3 of the percentile of selected traits, which include; CE, BW, WW, YW, Doc, YG, Marb, REA, API, and TI. Selecting for these traits allows the program to bring efficient, moderate, balanced females into production and produce bulls that will offer superior growth, eye appeal, carcass merit and a total genetics/EPD package to the cattle producer.

My family has been in the cattle industry for many generations, and we continue to adapt to the ever-changing times, striving for that optimal animal. We welcome visitors at the farm in LaCrosse, KS where the cattle are located.

LOT 22 - RFTW RESOLUTION FORT K014

Scott Sweasy
Newton, KS
316-243-7534

I started Sweasy Cattle Company in 2019 with the purchase of 6 Registered Angus pairs from John and Lance Ficken. I have added to my herd by purchasing stock from Triangle J, Ficken Angus and Sunflower Genetics.

My goal is to combine the two leading beef cattle breeds to develop quality Simmental / Angus cross cattle that provide hybrid vigor commercial cattlemen are looking for. I look to breed cattle that produce manageable birth weights, good growth, and not lose sight of the carcass traits that make

beef more valuable. I want to provide quality seed stock that will work for your operation and provide a very marketable and quality product for the end consumer. The offspring of these cattle will perform well in the feedlot as well as produce valuable replacements for years to come.

I'm working on building a future for myself and my children in the cattle industry, building on the heritage of our families. Raising my children within the beef industry and passing on the work ethic and responsibility it provides.

Cow Bull. Another nice Highlife son, with top 30% growth in WW and YW. Very balanced EPD's across the board.

SimAngus™

The function of crossbreeding is to maximize heterosis or hybrid vigor, but it is important to utilize breeds whose genetics will complement each other. SimAngus™ is a convenient way to capture heterosis and value. This crossbreeding system has the ideal balance of maternal and carcass traits. No two breeds offer more commitment to profitability.

\$All Purpose Index (\$API)

predicts cow herd profitability using valuable traits like cow longevity (STAY) and calving ease while keeping pressure on terminal traits.

Compare the profit of two Simmental bulls using \$API.

1. Bull A's \$API = \$120 and Bull B's \$API = \$180
2. Breeding 25 females/year
3. Used for 5 years

Bull	\$API		# of females per year		# Years using the bull		Profit Potential
A	\$120	X	25	X	5	=	15,000
B	\$180	X	25	X	5	=	22,500
Difference=							7,500

Just like an EPD, compare two bulls to see the expected difference in profit. Bull B is likely to result in direct revenue and expense savings of an additional \$7,500 over the course of five years. Plug in your numbers for 1, 2, and 3 to compare your potential earnings.

Schlegel Angus Ranch

Derrick Schlegel
Alexander, KS
785-731-5221

Schlegel Angus Ranch started in 2008 with females purchased from Ficken Angus and Lyons Ranch. Since then, I have added females from Dalebanks Angus, Mill Brae Ranch, Larson Angus Ranch and Stevenson Diamond Dot. The main goal of my program is to produce cattle that are feed efficient, grow well, have excellent carcass quality, and can make a great cow. I maintain a strict 30-day heifer and 45-day cow breeding season. The cattle are AI'd one time and then the bulls are tuned in. Any animal that is open is culled. I retain the top end of each bull crop to use as clean-up on commercial

cows owned by my family. We retain ownership in those cattle through the feedlot. Carcass and feedlot data on those cattle is available. Several of those top bulls are in this sale. My hope is that the bulls in this offering will be able to add value to your calf crop and cowherd making you more profitable.

Heifer Bull with lots of marbling.

Why Marbling Matters

- Premiums for Prime have more than doubled from 4 years ago.
- Discounts for Select have more than doubled from 4 years ago.
- In the last 4 years, the Prime - Select spread has increased every year and the trend is accelerating.
- Discounts for yield grade 4's and 5's have decreased.
- CAB premiums are generally flat from 4 years ago.
- The Prime premium is now more than 5 times the CAB premium.

National Weekly Direct Slaughter Cattle Premiums and Discounts

5.0/up > 1.2"	(25.00) - (10.00)	(17.79)

Based on individual packer's quality, cutability, and weight buying programs. Values reflect adjustments to base prices, dollars per cwt., on a carcass basis.

* If yield grades are not available, yield differentials may be based on fat at 12th rib using a constant of average ribeye area and muscling for carcass weight and KPH. Superior or inferior muscling may adjust lean yield.

Rosemayne Angus

Craig and Kristi Rucker

Burdett, KS

620-285-1250

Let me introduce myself and family. I, along with my wife Kristi, own and operate Rosemayne Angus in Burdett, KS. Our cow herd is primarily made up of retained heifers and a small embryo program from purchased donors. We focus on high maternal traits, strong growth and moderate milk, as well as keeping carcass traits in mind as we make breeding decisions. It is my hope and belief that you will like the cattle you see as you

look through our offering. If there is anything we can do to assist you with your seedstock needs, please let me know.
